Internet Users 3.6B people $\sim 40\%$ of world

How does it all work?

Why was it designed this way?

CS144

Isn't it really difficult....?

Goals

- 1. To learn how the Internet works.
- 2. To learn why the Internet was designed this way.
- 3. To learn how to use the Internet.
- 4. To build some significant pieces of the Internet.
- 5. To learn the underlying principles and technologies of networking.

CS144 studnets are....

How each week goes

CS144 is divided into week-long units, devoted to a particular topic. e.g. the 1st week is about Basic Principles, the 2nd week is about Transport.

There are two types of week:

- 1. "Video Weeks"
 - Three lectures (MWF). Mandatory attendance.
 - Occasional in-class exercises and guest speakers.
 - A short pop quiz on Friday in-class.
 - Videos to watch in your own time.
 - Short graded online quiz at the end of the unit due Monday 12pm PT.
- 2. "Lecture-only Weeks"
 - Same as above, but no videos to watch and no online quiz.

For example: In week 1 you watch videos about Basic Principles and take the online test before Monday Sept 21st at 12pm. You will have a pop quiz on Friday.

How we calculate your grade

- 1. Programming assignments 50% 8 Labs (5% or 10% each) Get started!!!
- 2. Quizzes & Exams 50%

End-of-unit quizzes 10% (online quiz in video weeks) Midterm: 20% (50mins) Final: 20% (50mins)

Exam Policy in the time of COVID

We are working on exam details and will let you know...

/ID

Labs

- Programming is in C++
- CS110 is a prerequisite.
- Late policy:
 - 3 late days (24 hours) of your choosing.
 - At most 2 late days for one lab.
 - After you use up your late days, late labs are not graded.

"Thank goodness you're here—I can't accomplish anything unless I have a deadline.

For each Lab:

- 1. Certificate for BEST submission,
- Certificate for FIRST CORRECT submission. 2.

Workload

- This is a 4-unit workload, which means a workload of about 12hrs/week
- Our estimate based on previous years
 - 1. Videos and quizzes: 0-3hrs/week
 - 2. Class time: 3hrs/week
 - 3. Labs and preparing for exams: Avg 6hrs/week
 - 4. Average overall 9-12hrs/week

Contact

For anything non-private: **Piazza**

If private: Private Piazza posting, or email cs144-aut2021-staff@mailman.stanford.edu

If it's personal (e.g. a medical emergency): email Nick or Keith nickm@stanford.edu and keithw@cs.stanford.edu

The Honor Code

- We take it seriously and we expect you to take it seriously too.
- Last year was a bad year with several CS144 students getting into a lot of trouble (3)
- None of them had set out to cheat: At the last minute, they copied an assignment off the web, then tried to modify it. It doesn't work!
- We use special tools to compare solutions against current and previous years and solutions we find on the web.
- Please, let's have a zero-violation year.

The Honor Code

<u>Permitted Collaboration</u>: The following items are encouraged and allowed at all times for all students in this class:

- Discussion of material covered during lecture, problem sessions, or in handouts
- Discussion of the requirements of an assignment
- Discussion of the use of tools or development environments \bullet
- Discussion of general approaches to solving problems \bullet
- Discussion of general techniques of coding or debugging \bullet

The Honor Code

Unpermitted Collaboration: All submissions must represent original, independent work. Some examples of activities that do not represent original work include:

- Copying solutions from others or knowingly allowing others to copy your solution.
- Use of solutions posted to websites is prohibited.
- Placing your source code in a public repository where others can copy it is unpermitted lacksquarecollaboration.
- Debugging code for someone else.
- Collaborating on or discussing the online graded quizzes before you have completed them.

What to do next

- Look around and get familiar with https://cs144.stanford.edu
- Watch half the Unit 1 videos before Wednesday's class. These videos are quite simple and descriptive and should be a quick watch; 1.5x speed-up should work well.

Start working on Lab 0! It is due next Monday.
